2024 BACK to SCHOOL

LINQ

Welcome Back!

Whether this is your first school year, or your last, Wicomico County Public Schools Food & Nutrition Services Department welcomes everyone to a new school year.

For several years, we have used **MyPaymentsPlus** as an online meal payment system. We have transitioned to a new payment system beginning this school year called LINQ Connect. You can conquer the upcoming school year with ease, thanks to our new system, LINQConnect.com and the all-new LINQ Connect app.

With LINQ Connect, you can simplify the payment process for meal accounts. To get started, download the LINQ Connect app from the Google Play or Apple Store or visit LINQConnect.com.

- Effortlessly track previous transactions
- Establish spending limits
- Transfer funds between students
- Receive convenient low balance notifications.
- Set up one-time or recurring payments for your child's meals

LINQ Connect puts you in control, making it easier than ever to manage your student payment needs. Let LINQ Connect take the burden off your shoulders, giving you more time to focus on what matters most: your child's success.

Rest assured any funds that were on your student's account at the end of last year have been transferred to the LINQ Connect account. Just like MyPaymentsPlus, setting up, accessing, and monitoring your student's account is offered at no charge. Fees will apply only when adding funds to the account.

Together, let's make it a great year for your child's education.
